ASSESSMENT QUESTIONING:	DIFFERENTIATION:	RESOURCES:

PROCEDURES:

Today we will be creating an “spirit” animal drawing using they style of Amber Marie Hunt.

1. To begin, allow students several minutes to choose an animal they believe represents them or something about them
 - can use the Animal Symbolism List for ideas (appendix 1)
2. Each student will then need a piece of drawing paper, pencil and eraser
 - students will need to sketch out their chosen animal
 - sketch should be very basic, not a lot of detail (detail will be added with colored pencils)
3. As students begin to finish their sketches give a quick demonstration of the colored pencil techniques using a partially started “spirit animal” drawing (one that already has some area colored)
4. After the demo and students have their animals sketched out in pencil they will need a bag of colored pencils, using the colored pencil technique handout, students will begin to create detail and color to their animals
5. If students begin to finish their animals with remaining class time they can add other elements (flowers, plants, clouds, bugs, rainbow, rain...) or a background to their piece
 - students may use watercolor to finish the background of their piece if they choose (or are burned out on colored pencil)
6. Mount drawing onto black construction paper when finished
7. CLEAN UP: return all supplies to the supply table
 - paintbrushes in brush bath
 - water cups in sink

IF there is time to fill at the end of class play [Fun Test: Which is Real? Vol 10](#)

REFLECTIONS- What worked/ didn't? What would you do differently next time? How could the lesson improve?
